True Story Or Internet Myth?

You may have heard the story, passed around in forums and chat rooms, of an easy-going pajama-clad individual who made a fortune from his kitchen table – with nothing more than an old laptop computer.

Is it a true story or just another Internet myth?

Unfortunately, for 95% of all would-be online entrepreneurs this has been an elusive dream that is forever out of reach.

In this report and the accompanying video, I'm going to show you why they keep failing ... and how you can be one of the 5% who succeeds. How you truly can be one of those lucky few who do make money from their kitchen table ... or poolside ... or beach bungalow.

See ... it's not an elusive dream, if you do it right.

Work Smarter, Not Harder

Once upon a time, everyone thought that if you only worked harder, you could succeed. If you just got up earlier, put in more hours, busted your hump more, you would become rich. Wealth was there for anyone willing to work hard enough to get it.

But times have changed.

You could work from sunrise to sunset, cranking out more widgets in your widget-making factory, but there's just not enough hours in the day for you to become a rich widget maker. The days of becoming wealthy as a manufacturer are long gone.

There's no more money to be made sweating in a factory. There's no more security in an offline business. But, there is a place to make money – it's called the Internet.

But, even on the Internet, too many are working harder, not smarter.

Pick An Easy Way To Make Money

The first step in working smarter is to pick an easier method for making money. Some of the methods for making money online are still going to have you working hard for that elusive buck. Putting in long hours just to make a few dollars is not working smarter.

For example: Some online entrepreneurs are chasing the promise of riches from serving offline businesses. They work hard to build websites for these businesses, try every tactic under the sun to get the website ranked high in Google, and watch as a change in Google's notorious algorithm wipes out all of their hard work.

Also, some of the methods being used by some online entrepreneurs (such as putting on a suit and tie, and pounding the pavement to drum up offline clients) are not going to let you work at your kitchen table in your pajamas. And, let's face it, if you can't have that kind of freedom why even be an entrepreneur?

But, there is a way to make money online that lets you sit back in your pajamas and make money ... from your kitchen table ... with just an old computer. You never have to meet customers – online or off. You never have to do any soul-destroying selling. You never have to ship any products.

This easy, hassle-free way to making money online is ... affiliate marketing.

Done right, affiliate marketing allows you to make a good living from the comfort of your own home, but ...

Most People Are Doing It Wrong

Yes, affiliate marketing is an easy way to generate a great income online. It definitely will allow you to make your living from your kitchen table. However ... most people are doing it wrong.

Maybe you even know people who have tried affiliate marketing ... and failed. Or maybe you've even been there yourself. You tried hard, but you never made much money.

That's why you have to work smarter, not harder. This is vital!

To fully understand this, and see exactly how you can work smarter and make a very good living in affiliate marketing, set aside 14 minutes right now and watch this important video.

In this video, I demonstrate exactly how you can easily & quickly start generating a good income from affiliate marketing. I demonstrate how a simple method has you working smarter ... and making more money for less effort. I reveal the simple method I've been using since 2007 to make 10x as much in commissions for the same amount of effort.
